## Microsource™

Create and update forms, financial reports, legal documents, correspondence in seconds. Generate personalized form letters quickly. Print all or selected portions of a document on single sheets . . . or continuous forms. Assemble original documents from a library of your most versatile and time-tested paragraphs and sub-documents. Make letter-perfect single copies of form letters on your stationery. Copies that look hand-typed. Make up to eight carbon copies with a single impression. Create stencils and camera-ready copy.

**AutoScribe** is an extremely versatile microcomputer-based document processor and text editor. Documents may be created, revised, viewed, printed, copied, saved and appended together with simple keyboard commands. Not a single sheet of paper need be produced until the final document is printed. Yet **AutoScribe** is so easy to use, any typist can learn to operate the system in less than an hour.

Designed by a lawyer to speed up the creation of legal documents from a library of standard paragraphs, **AutoScribe** is capable of handling individual documents up to 70 single-spaced pages in length (140 double-spaced pages). And of printing out a series of documents at a speed of up to 600 words per minute to create a final volume of unlimited length.

# AutoScribe

For rapid manipulation of texts and entire libraries of standard paragraphs, documents are permanently stored on low-cost, lightweight floppy diskettes. From one to forty individual documents may be stored on a single diskette, with an automatic index to the documents.

Your typist does all her work at the video display keyboard. The text appears on the screen exactly as it will appear on the printer. Keyboard commands correct typing errors visually right on the screen. And documents are usually printed only after the text has been revised to the operator's satisfaction. **AutoScribe** has the power to greatly increase your productivity and efficiency.

The new high-capacity **AutoScribe** features ease, simplicity, flexibility and convenience unmatched by conventional paperwork management . . . your solution to impossible deadlines, soaring clerical costs, overflowing files and laborious re-typing.

- Unlimited revisions
- Unlimited insertions
- Unlimited text deletions
- Automatic carriage return and text wraparound
- Horizontal and vertical tabulation
- Underlining and headline centering
- Justification of text
- Search mode for rapid location of any part of the text of a document
- Append mode for joining separate paragraphs and sub-documents together to create a new document
- Display and printing of document indexes
- Single-page stationery of continuous forms printing
- Single copy or multiple carbon copies
- Dozens of easily interchangeable type fonts in pica and elite pitch
- Interchangeable cloth and carbon film ribbons

The new, high-capacity **AutoScribe** now offers these additional features as well:

- Reverse scroll with up to nine screens, depending on number of characters per screen
- Global search and replace, allowing replacement at all points automatically, or at each point individually
- Improved insertion, leaving the following 60 characters displayed at the bottom of the screen
- Multiple deletion of copies . . . multiple copy of documents
- Improved justification, with proportional spacing between letters (Diablo, NEC and Qume only)
- Faster printing (Diablo and Qume printers run at about the same speed as the NEC — 55 characters per second)
- Vertical pitch selection, allowing for variation in lines-per-inch (from one to eight, so you can print at 1, 1½, 2½ or 3 spaces between lines)
- Horizontal pitch selection (Diablo and Qume only), so you can vary characters-per-inch from six to 12
- Format flexibility: change automatically to new margin spaces, line and page length, horizontal and vertical pitch.
- Rapid deletion from any desired point to the end of the document
